PROFILE

I am a curious professional with 5 years experience in SAS. I am passionate about data analysis, data literacy and problem solving with code. Experienced Data Consultant with a background of SQL and ETL, providing analysis and reporting to leaders

EMPLOYMENT HISTORY

Data Consultant (SAS), Econocom   São Paulo

Apr 2020

- SAS developer working remotely for the 2nd biggest brazilian bank.
- Current project is a requirement from *Banco Central* (BACEN). I am working to **collect** and **automate** KPIs that are reported manually. My team is accountable for automate **almost 1,200 KPIs** required by BACEN. Almost all departments will be affected by this project and **we estimate a lot of time and effort savings** for each one.
- I am also the accountable for create the job that will join all kpis and calculate their risk status for each indicator and send alerts to compliance teams
- I have to improve existent sas jobs too

Senior Data Analyst, Santander Bank   São Paulo

Jul 2013 — Apr 2020

- All my experience was in the MIS team. I started as an Intern and became Senior 3 years later. I worked in many projects with different roles: I started making SQL queries and simple reports, moved to Data Architeture team to desing data solutions to others departments. My last job was for BI & Analytics department. Where I did studies and dashboards to support data driven decisions.
- My most rewarding project was internalize an entire BI process from a data analytics vendor that was too expensive and wasn't meeting expectations. It was 14 months of meetings and specifications and coding and building from scratch a customized solution for the company. Saving, in the first year, 3.8M BRL on contracts and data analysis. This project saved a lot of time too

HOBBIES

watching anime, reading,
running and play video games

Business Intelligence Intern, Honda Motors   São Paulo
Dec 2010 — Sep 2012

- It was my first experience in data field. I learned a lot from my peers and senior colleagues. I worked in sales team supporting SAP BW routines, change requests, system improvements and reports.

EDUCATION

undergraduate, FATEC   São Paulo
Jan 2017 — Jun 2021

I am about to finish my first College degree and I won't stop here.

In 2010 I started Systems Analysis and Development 3 years college and did not finish on time. I prioritized my career and being self-taught in programming helped me.

But when I stabilized my carrer I went back to college.

My next step is to enroll in a Statistics course.
